Custom Mitsubishi Cable Assembly Specialist

Direct Connect Systems has expanded our offering of custom cable solutions for Mitsubishi Servo Systems. We now carry in stock the hard to find connectors used on the Mitsubishi MR-J3 Servo System. This allows us to offer a vast number of custom solutions in a short lead time.

- Any Length is Standard
- Jacket and Flexing Options
- Shielded Power Cables
- Sealing Options

Experience Counts

The staff at Direct Connect Systems (DCS) has manufactured cable assemblies for servo systems for over 15 years. We have provided innovative cabling solutions for a broad range of automation applications.

Customs are Standard at DCS

Providing custom solutions and short lead times is standard at DCS. We've pre-engineered a broad range of cable features so we can build cable assemblies to your specifications.

How to Order or get more information?

- 1) Use the attached Request for Information Form and Fax it to us.
- 2) Call 800-445-5714 .
- 3) E-mail your request to sales@directconnectsystems.com.
